

A process look at getting functional specs

<p>Create contact group and contact list for business input and requirements</p> 	<p>Create a tool to collect info requests and business input</p> 	<p>Conduct information gathering using the tool</p> 	<p>Disposition the info. requests to BW or R/3</p> 	<p>Consolidate requirements and write functional specs</p> 	<p>Build storage objects and load programs</p> 	<p>Construct reports and navigation features</p> 
---	--	---	---	--	--	--

There are more than one way to collect this information, however, a formal process should exist to capture the requirements and also to communicate what is being developed.
